DEMO

Atlassian Confluence

The screenshot displays the Atlassian Confluence user interface. At the top, there is a navigation bar with the Confluence logo, "Spaces" dropdown, "People", and "Create" button. The left sidebar is divided into sections: "DISCOVER" (All updates, Popular), "MY WORK" (Recently worked on, Recently visited, Saved for later), and "MY SPACES" (Diccionario Libre, Altasio Internal, DXP E-Commerce, Demonstration Space, B2BSeller API, Altasio Sample Project, AltaPim). The main content area is titled "All updates" and lists recent changes, including updates by Belgica Janet and various attachments.

AltaPim - Matching Module

Created by Belgica Janet, last modified on Jul 26, 2016

Target release	Matching module
Epic	AP-44 - This module allows the customer to get a results on categories, attributes and images by using a list of items TO DO
Document status	STARTED
Document owner	@Belgica Janet
Designer	
Developers	@Jorge Luis Limo @Luis Barra
QA	@Belgica Janet

Goals

- Accuracy Data: through automation of data match is to obtain real resul
- Keep Information Projects: It seeks to track projects in real time having access to information from past projects and to make comparisons.

The screenshot shows a Bitbucket pull request interface. At the top left is the Bitbucket logo and the repository name 'atlassianlabs'. Below this is a sidebar with 'ACTIONS' (Clone, Compare, Fork) and 'NAVIGATION' (Overview, Source, Commits, Branches, Pull requests, Issues, Downloads). The main content area is titled 'Pull requests' and shows a 'MERGED' status with a branch transition from 'CST-1003' to 'master'. The commit message is 'Added setting to run events based automation rule in synchronous threads'. Below the message are tabs for 'Overview', 'Commits', and 'Activity'. The 'Author' is shown as a single profile icon, and 'Reviewers' are shown as three profile icons with green checkmarks. The 'Comments (2)' section contains two comments: one from a reviewer saying 'Very nice.' and another from the author agreeing to test the executor and suggesting a test rule.

1. Colaboración de código elevada a la máxima potencia
2. Git a gran escala
3. Modelos de despliegue flexibles
4. Repositorios privados ilimitados
